F50/50/62-4LCM-10G Quad Fiber 10Gigabit Passive TAP

Optional 2-Unit (19 Inch) Rack Mount

The F50/50/62-4LCM-10G Quad Fiber 10Gigabit passive TAP provides permanent access into four multi-mode fiber links. This network TAP is ideal for security applications, network monitoring and anywhere you need to see all the data that only an In-Line solution can provide. Invisible to the network and non-powered, fiber TAPs will not affect network performance or integrity.

- Passive, non-powered design

- Four TAPs allow you to connect to one tool per link; tools require a dual NIC card to receive both sides of the conversation

- Supports multiple topologies, including Gigabit Ethernet, ATM, OC3-OC192 and SONET

- View layer 1 and 2 errors not seen when performing network monitoring using SPAN ports

- Available with custom split ratios upon request

- Space saving design allows you to TAP up to eight links in 1U
