

## Veryx ATTEST™ ISISv6 Conformance Test Suite DATASHEET

**Veryx ATTEST™-CTS IPv6 version for Intermediate System – Intermediate System (ISISv6)** automated test suite provides Equipment Manufacturers and Service Providers an easy and efficient solution for verification of ISISv6 implementation in routers deployable in IPv6 networks. ATTEST enables significant speeding up of testing cycles and reduces the “time-to-market”.

Veryx ATTEST ISISv6 Conformance Test Suite is designed for conformance testing of the IPv6 version for Intermediate System to Intermediate System routing protocol in IPv6 networks. ATTEST ISISv6 relies on ATTEST -- a powerful test framework that requires minimal time for set-up and enables efficient use of time and resources.

Veryx has devised over 200 test cases that comprehensively test for ISISv6 conformance. These test cases have been grouped into 7 convenient test groups based on the ISO/IEC and RFC specifications for each category of functions.

### SPECIFICATIONS

- ISO/IEC 10589:2002(E)
- IETF RFC 1195
- IETF RFC 3719
- IETF RFC 3787
- IETF RFC 5308

### ISISv6 TESTS

- \* Adjacency Verification
- \* DR Election Group
- \* Routing Metric
- \* PDU Handling
- \* Frame Format
- \* Link state Database Updation
- \* Link state Database Synchronization

### PLATFORM REQUIREMENTS

- \* ATTEST 6.x Framework
- \* 3 Ethernet ports
- \* Serial or additional Ethernet port for DUT management

ISISv6 test cases verify the IPv6 version of IS-IS implemented in a Level 1 router, Level 2 router and Level 1/Level 2 router. ISISv6 test cases verify the generation and handling of valid and invalid Hello, Link State, Partial and Complete Sequence Number PDUs from the neighboring IS-IS routers in a broadcast network. It also verifies the best path calculation.

ATTEST-CTS ISISv6 Conformance Test Suite is written in industry standard Tcl scripts. Well-defined APIs and source files provide the flexibility to add, customize or modify the test cases for specific requirements.

Together with other ATTEST-CTS and ATTEST-XP test suites for IPv6 protocols, Veryx provides one of the widest ranges of test suites for verification of IPv6. Test suites for IPv4, Layer-2 bridging and Carrier Ethernet are also available.

### About Veryx Technologies

Veryx Technologies (formerly Net-O<sub>2</sub> Technologies) provides innovative Verification and Measurement Solutions for the global communications industry. ATTEST solutions verify networking equipment being used for Access, Carrier Ethernet, Data Center, Edge, Enterprise, Industrial and Security. The unique offerings from Veryx enable customers to reduce the “time-required-to-test” and enhance their “time-to-market”.

Veryx ATTEST™ is the trademark of Veryx Technologies. All other trademarks of respective owners are acknowledged.
